

Material-Hopper XS

SMALL VOLUME APPLICATION

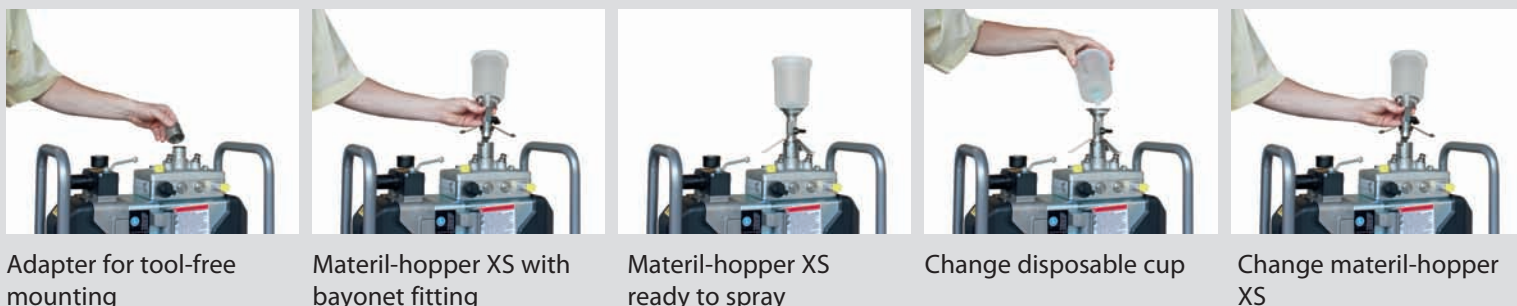

- Ideal for Cobra 40-10
- Application of small quantities
- Flexible and quick color change

Fast color changes - few solvent consumption

Small - Fast - Flexible

The double diaphragm high-pressure pump COBRA 40-10 allows color change or flushing with very small quantities of solvent. That's why the combination with the small hopper is an ideal solution for applications in the paint manufacturing for lab trials, developing new materials and coating tests. Or just for customers handling little work pieces and frequent color changes. Different adapters also allow the use of the WAGNER 5L-hopper as well as those from other suppliers (e.g. 3M, Walther Pilot).

5 steps for a fast change:

Adapter for tool-free mounting

Material-hopper XS with bayonet fitting

Material-hopper XS ready to spray

Change disposable cup

Change material-hopper XS

Order information:

	Material-hopper set including pump adapter, stand, bayonet fitting, ball valve, return pipe, 2 gravity cups and filter cartridges	2321424
	Gravity cup, 10 disposable cups including cover and ventilation. Filling quantity 700 ml	2327245
	10 filter cartridges. mesh size 195 µm	2327251
	Adapter for WAGNER 5L material-hopper	935050
	Adapter for Walther Pilot 600 ml gravity cup	2321339
	Adapter for 3M gravity cup systems	2320842
	AirCoat hose package 3m long – including DN3 material hose and air hose	2322656
	Demonstration kit <ul style="list-style-type: none"> • Starter set with 4 cups, covers and filter cartridges, 3m AirCoat hose package DN 3, AirCoat gun GM 4700AC • one air cap red and blue each, complete • standard nozzle 0,009", 0,011" and 0,013" • pre-atomizer nozzle 0,010" and 0,012" • 3 Cage-Filter reach: ed, yellow and blue 	2327252
